

From Prompts to Packages

How

Claude Code Skills

Work

Christian Dussol

Claude Code Skills: have you heard of them yet ?

You package deployments with Helm

Infrastructure with Terraform

Policies with policy engines

Your engineering expertise? Still copy-pasting prompts

Here's how **Skills** change that ...

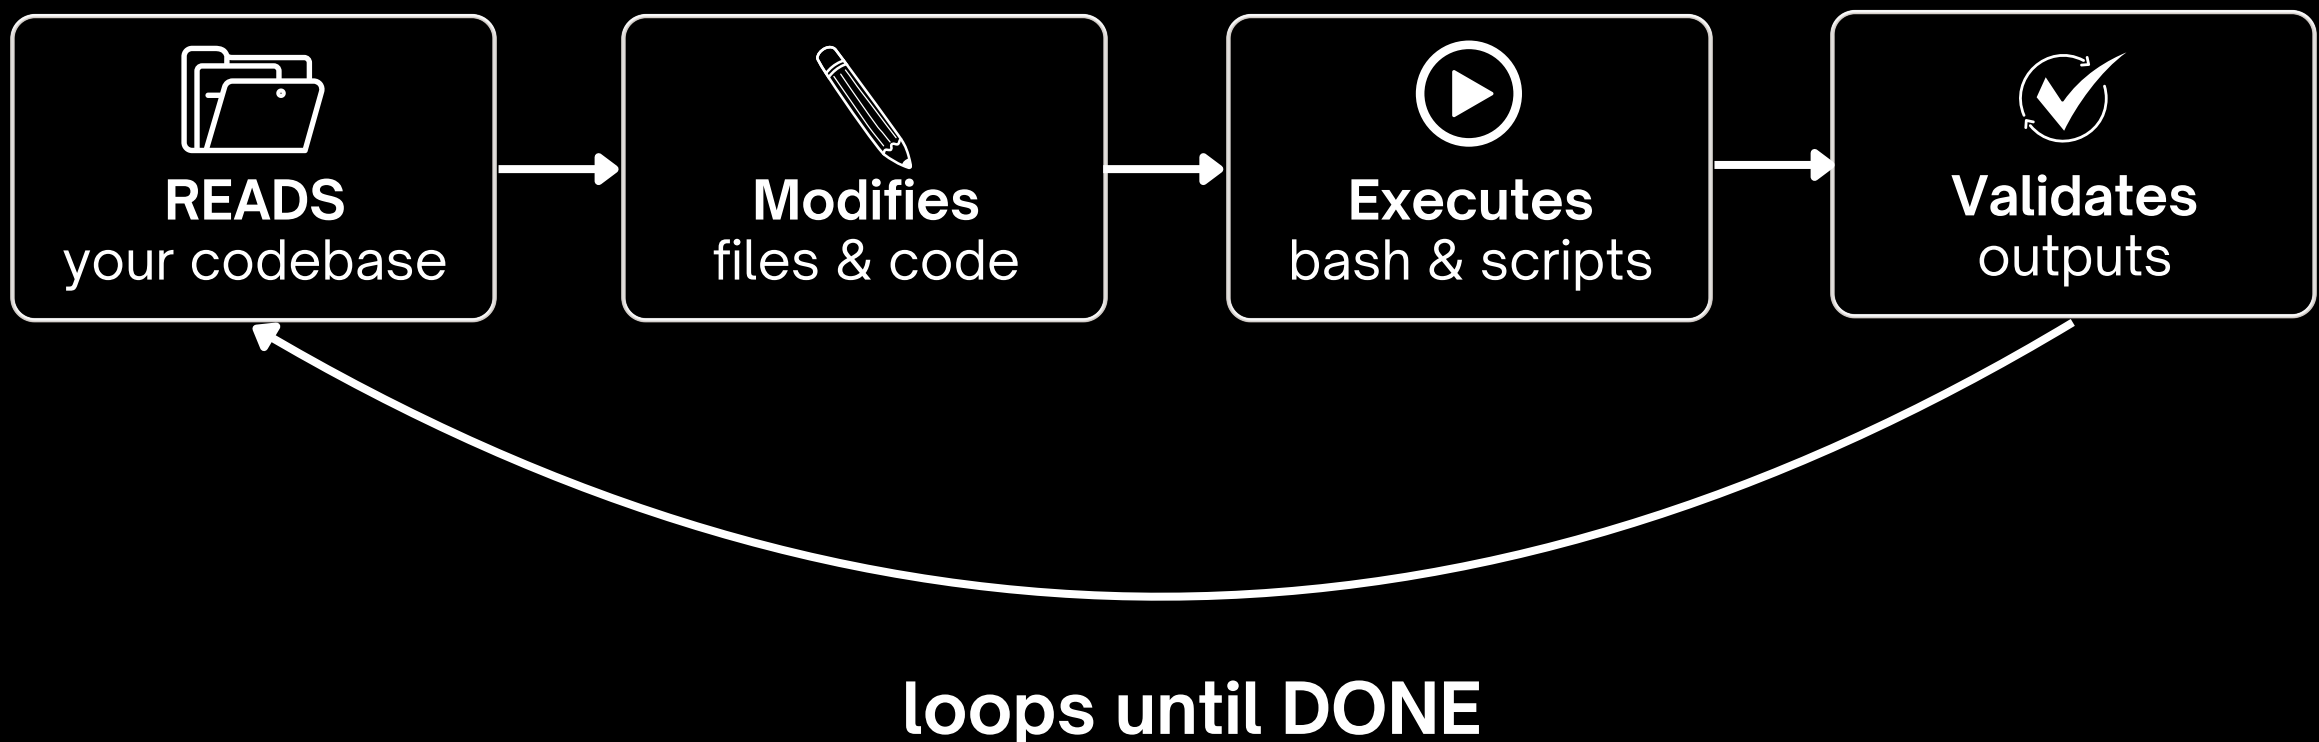

What is Claude Code ?

Claude Code is a terminal-native AI agent
for your code base

Not a chatbot. An agent. Autonomous loop

Agentic loop

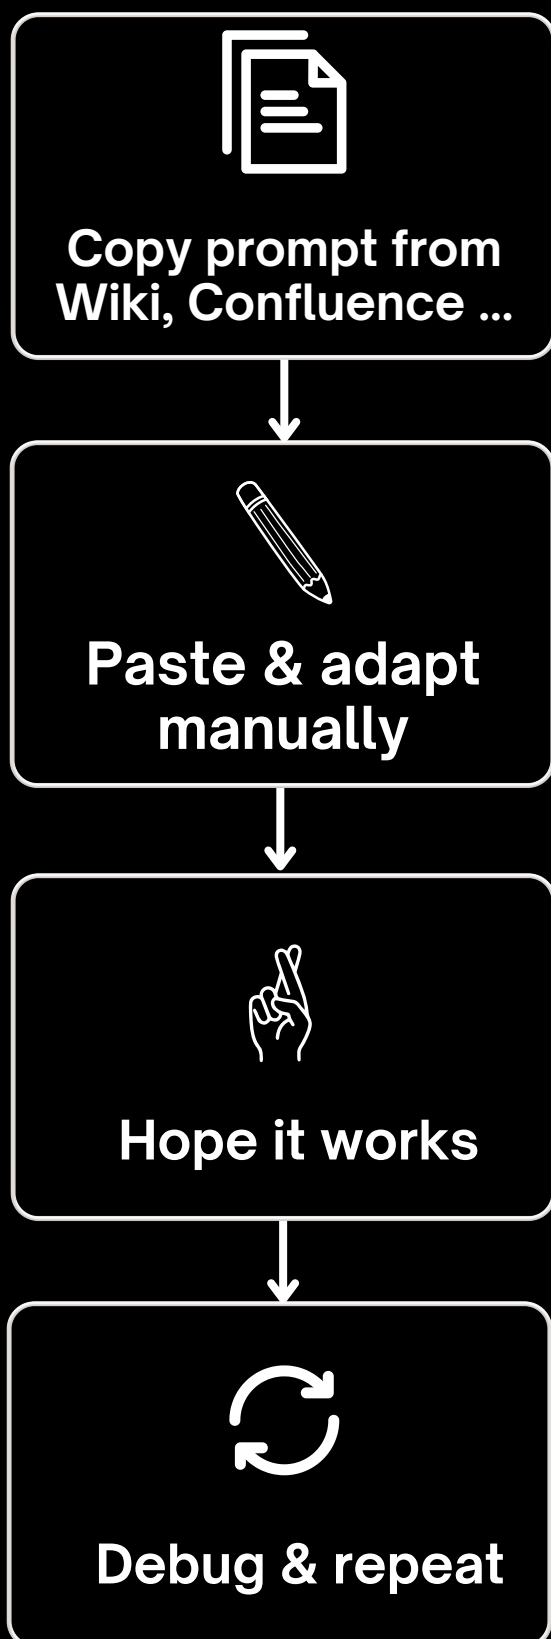

What are Skills ?

Skills = reusable expertise packages

Describe your need. **Claude** matches the **right Skill**

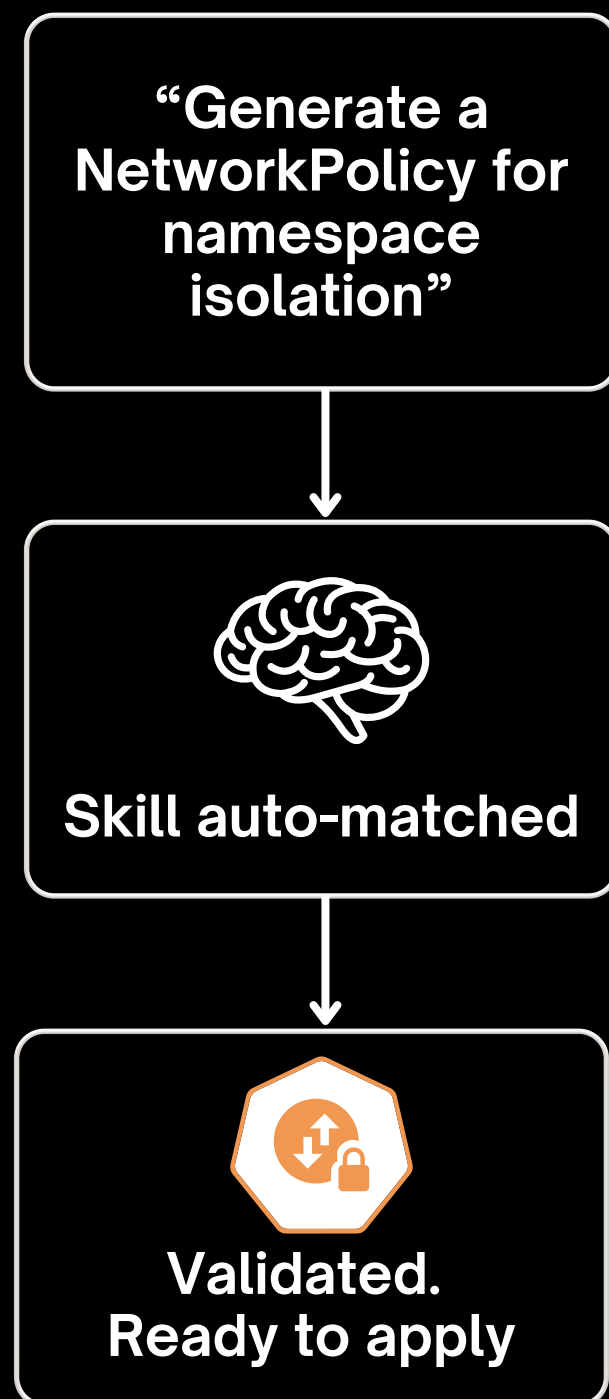

Without Skills

Inconsistent results

With Skills

Reproducible

Anatomy of a Skill

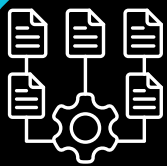

Three layers. Declarative. Auditable. Portable.

SKILL.md

- name & description
- trigger conditions
- input expectations

WHEN
to activate

instructions.md

- step-by-step logic
- validation rules
- edge cases & best practices

HOW
to execute

templates/

- output yaml, scripts, docs
- reusable assets

WHAT
to produce

Invocation flow

No commands. No plugins. Model-driven

“Generate a NetworkPolicy
for namespace isolation”

Natural language

Semantic Matching

Claude scans all available Skills

Auto detection

Sandboxed Execution

Isolated environment, full context

Secure & Traceable

network-policy.yaml

Ready. Validated. Auditable

Structured output

The real unlock isn't coding faster.

**It's packaging your team's expertise
into reusable, auditable Skills**

This is Part 1: concepts.

**Part 2 is coming: production-ready Skills for
K8s governance and compliance.**

 **What task would you package first ?**
